Table of Contents

Preface
V.L. Patel, A. Hasman 1
An open, component-based information infrastructure for integrated health information networks
M. Tsiknakis, D.G. Katehakis, S.C. Orphanoudakis (Greece) 3
XML-based application interface services—a method to enhance integrability of disease specific systems
U. Altmann, A.G. Tafazzoli, F.R. Katz, J. Dudeck (Germany) 27
A methodology for incorporating web technologies into a computer-based patient record, with contributions from cognitive science
C. Webster (USA) 39
Combining diagnosis and treatment using ASBRU
A. Seyfang, S. Miksch, M. Marcos (Austria, The Netherlands, Spain) 49
Representation primitives, process models and patient data in computer-interpretable clinical practice guidelines: A literature review of guideline representation models
D. Wang, M. Peleg, S.W. Tu, A.A. Boxwala, R.A. Greenes, V.L. Patel, E.H. Shortliffe (USA) 59
An evaluation of the usefulness of two terminology models for integrating nursing diagnosis concepts into SNOMED Clinical Terms®
S. Bakken, J.J. Warren, C. Lundberg, A. Casey, C. Correia, D. Konicek, C. Zingo (USA, UK) 71
Supporting decisions in medical applications: the knowledge management perspective
S. Montani, R. Bellazzi (Italy) 79
Data quality probes—exploiting and improving the quality of electronic patient record data and patient care
P.J.B. Brown, V. Warmington (UK) 91
Home care delivery through the mobile telecommunications platform: the Citizen Health System (CHS) perspective
N. Maglaveras, V. Koutkias, I. Chouvarda, D.G. Goulis, A. Avramides, D. Adamidis, G. Louridas, E.A. Balas (Greece, USA) 99
The patient clinical information system (PatCIS): technical solutions for and experience with giving patients access to their electronic medical records
J.J. Cimino, V.L. Patel, A.W. Kushniruk (USA, Canada) 113
Requirements and prototyping of a home health care application based on emerging JAVA technology
L. Lind, E. Sundvall, D. Karlsson, N. Shahsavar, H. Åhlfeldt (Sweden) 129
Visualization methods for data analysis and planning in medical applications
R. Kosara, S. Miksch (Austria) 141
Haptic reproduction and interactive visualization of a beating heart for cardiovascular surgery simulation
M. Nakao, H. Oyama, M. Komori, T. Matsuda, G. Sakaguchi, M. Komeda, T. Takahashi (Japan) 155
Using the critical incident technique to define a minimal data set for requirements elicitation in public health
C. Ölvingson, N. Hallberg, T. Timpka, R.A. Greenes (Sweden, USA) 165
Guideline and quality indicators for development, purchase and use of controlled health vocabularies
P.L. Elkin, S.H. Brown, J. Carter, B.A. Bauer, D. Wahner-Roedler, L. Bergstrom, M. Pittelkow, C. Rosse (USA) . . 175
Leveraging XML-based electronic medical records to extract experiential clinical knowledge: An automated approach to generate cases for medical case-based reasoning systems
S.S.R. Abidi, S. Manickam (Canada, Malaysia) 187
Statistical analysis of the nursing minimum data set for the Netherlands
W.T.F. Goossen (The Netherlands) 205
Adaptive user interface customization through browsing knowledge capitalization
C. Ghédira, P. Maret, J. Fayn, P. Rubel (France) 219
